Who Are We?

In a constantly evolving global environment, Oumou Group stands out as one of the most visionary players on the continent. With over 20 years of experience, the company has built a strong reputation across three strategic sectors: technology, medical equipment, and agriculture.

Over the years, Oumou Group has developed cutting-edge technological solutions, international realities. From digital specialized software, the Group institutions, and private companies in In the medical field, the company address the structural challenges of understanding of on-the-ground equipment that meets international clinics, and governments to modernize

The Group is also active in agriculture, a key advanced technologies and artificial intelligence at every stage of the agricultural value chain, Oumou Group contributes to the sustainable transformation of the sector while improving productivity and resilience for producers.

Beyond Senegal, Oumou Group has expanded into Côte d'Ivoire, Guinea, Benin, the Democratic Republic of the Congo, Niger, the Central African Republic, and Chad, thereby strengthening its continental presence and its role as a strategic partner for numerous African states.

deep expertise that now enables it to deliver perfectly adapted to both African and transformation to the development of supports public administrations, their modernization efforts.

distinguishes itself through its ability to the healthcare sector. With a thorough needs, Oumou Group provides standards and works closely with hospitals, healthcare infrastructure.

Oumou Technology supports companies, institutions, and organizations in their digital transformation through reliable, scalable technologies tailored to African realities.

Driven by a forward-looking vision, Oumou Technology positions itself as a strategic partner for any organization seeking to strengthen its technological capabilities, modernize its tools, and successfully achieve a sustainable digital transition.

INNOV HUB

OUR BUSINESS UNIT

Oumou Group is a pan-African catalyst for digital sovereignty, specializing in identity, GovTech, and critical infrastructures. With over 20 years of expertise, the Group designs and operates integrated solutions including biometric enrollment, decentralized identity, multi-sector e-KYC, civil registry systems, e-payroll platforms, citizen engagement platforms, and sovereign digital systems.

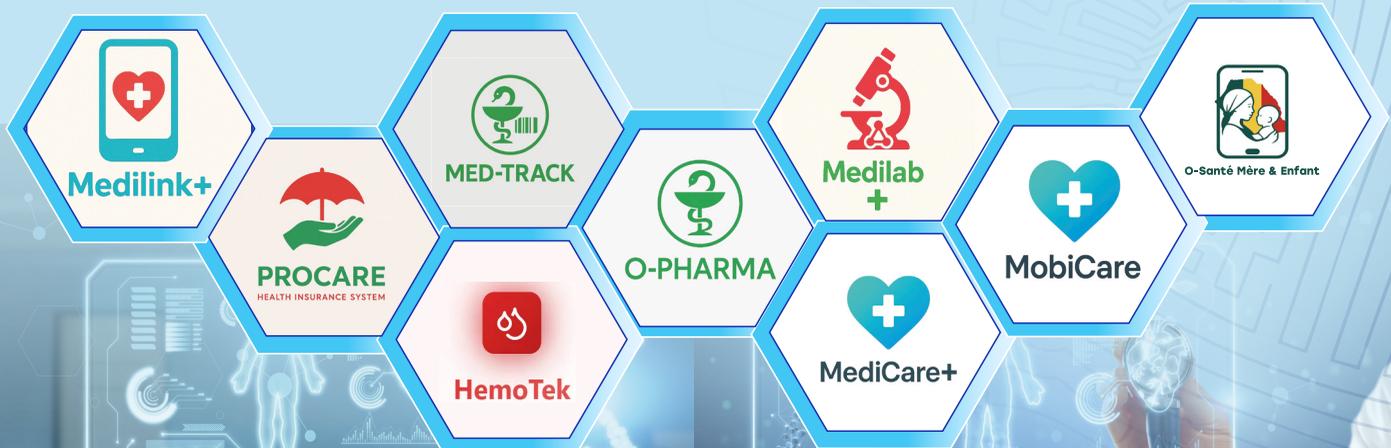

Through its Innov Hub division, Oumou Group develops mobile applications, microservices architectures, sovereign cloud infrastructures, as well as artificial intelligence, IoT, and blockchain solutions tailored to African realities—while incubating national GovTech projects.

More than a technology provider, Oumou Group positions itself as an architect of Africa's Digital Government (DigiGov) ecosystem.

Oumou Group also develops additional strategic stacks, notably in education, healthcare, defense, agriculture, and identity, while actively engaging in incubation initiatives to foster the emergence of high-impact innovative solutions.

UMOU HEALTHTECH IS THE INNOVATION BUSINESS UNIT OF OUMOU GROUP DEDICATED TO TECHNOLOGICAL SOLUTIONS FOR THE HEALTHCARE SECTOR IN AFRICA. WE DEVELOP A COMPLETE ECOSYSTEM OF INTERCONNECTED APPLICATIONS TO ADDRESS THE CHALLENGES OF THE AFRICAN HEALTHCARE SYSTEM.

When technology cultivates performance.

Land was established to address the new challenges of agriculture in Africa, where demographic growth, climate change, pressure on natural resources, and evolving value chains require a profound transformation of agricultural practices.

Our mission is to support this transformation by providing farms, cooperatives, agro-industrial companies, and public institutions with innovative technological solutions tailored to field realities.

Umouu For Land brings together a range of tools and services designed to improve productivity, profitability, and sustainability of agricultural operations through the use of technology and data.

We integrate next-generation IoT sensors, drones, intelligent management systems, data analytics tools, and connected digital platforms to provide a complete, real-time view of crop and soil conditions.

Medical & IT After-Sales Service

Oumou Group's integrated After-Sales Service covers both medical equipment and IT infrastructure (IT systems, networks, data centers, digital health solutions). It provides preventive and corrective maintenance, responsive technical support, spare parts management, and user training — ensuring patient safety, optimal equipment availability, and continuity of healthcare and digital services, with the support of certified teams and an authorized Lenovo service center.

Our team consists of experienced engineers specializing in both medical and IT fields.
